

United Kingdom

Here at Ashi Therapies we offer 2 different but very specific therapies to meet the individual needs of our clients. The Rossiter System. The Rossiter System is used to alleviate muscular/ connective tissue pain from long term issues, for example Carpal tunnel, Plantar fasciitis or Sciatica. The Rossiter System can then also be used for many other non specific muscular/connective tissues issues such as back pain, hip pain, neck pain etc... Ashiatsu BareSole Massage We use Ashiatsu BareSole Massage which is therapeutically deep and one of the deepest massages available, to help support & maintain a good healthy connective tissue system, keeping you supple, moving freely and most importantly pain free, so you can get back/ continue enjoying your life as soon as possible.
